On average, how many security alerts does your organization see on a daily basis?

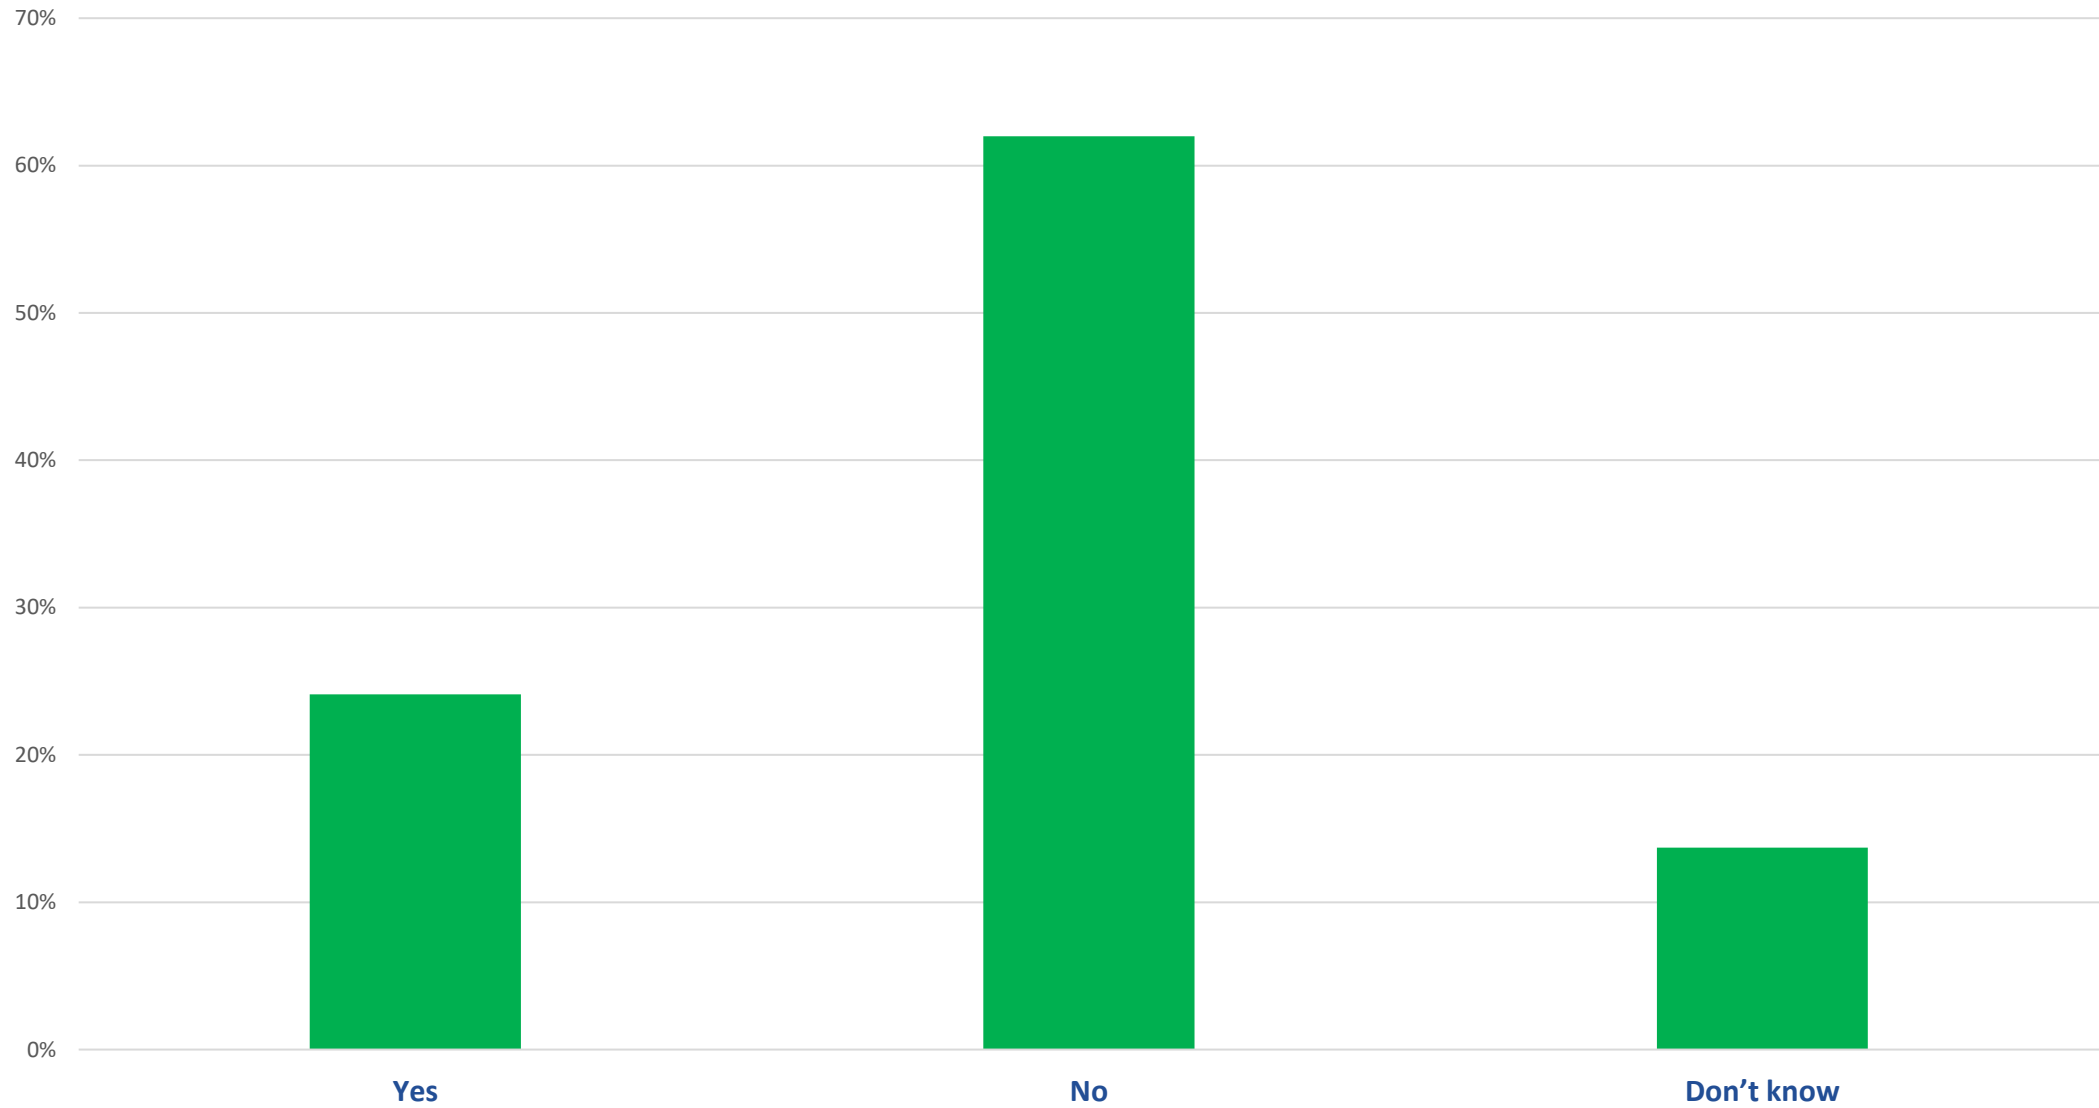

How challenging is the orchestrate alerts from multiple security vendors?

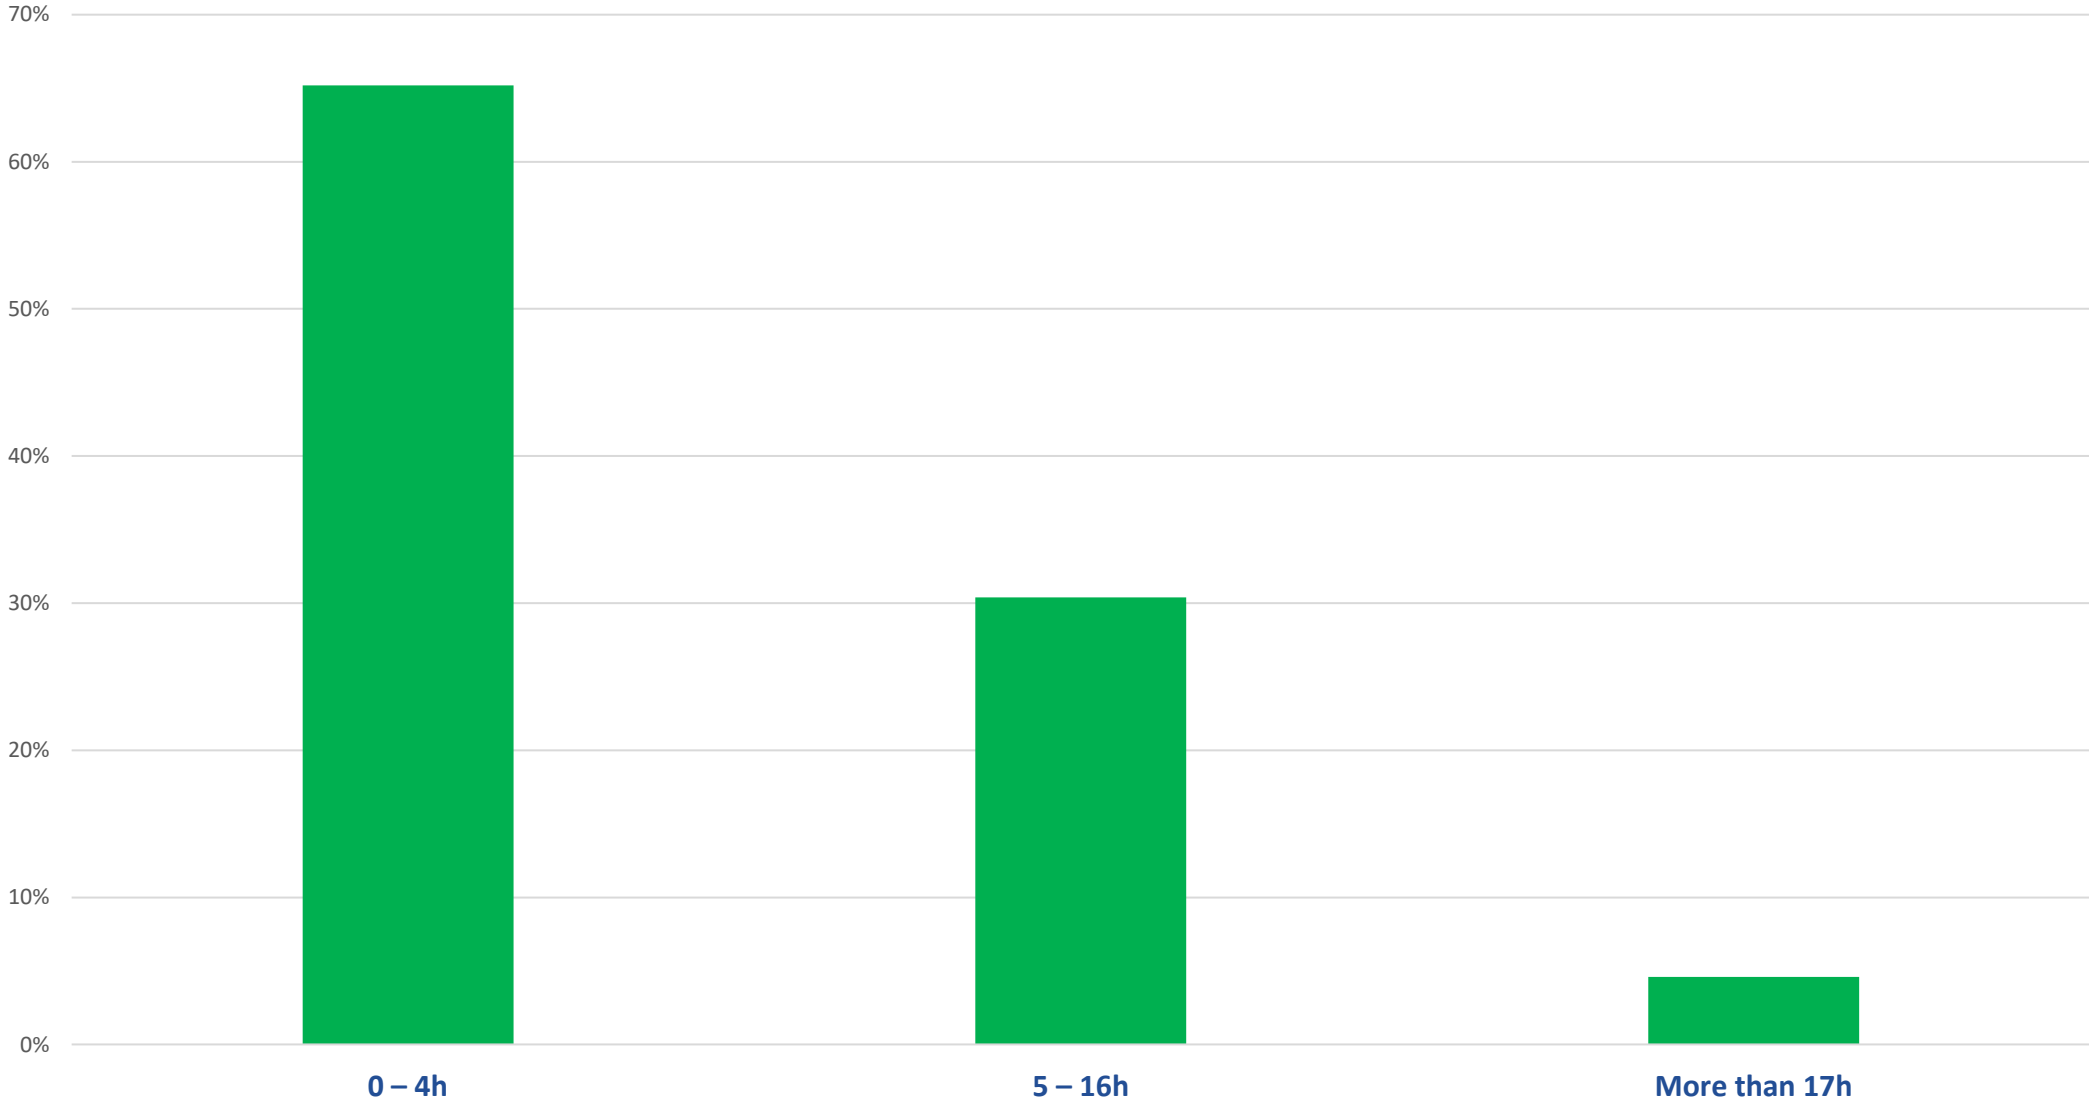

Are you planning to increase the use of automation in security products?

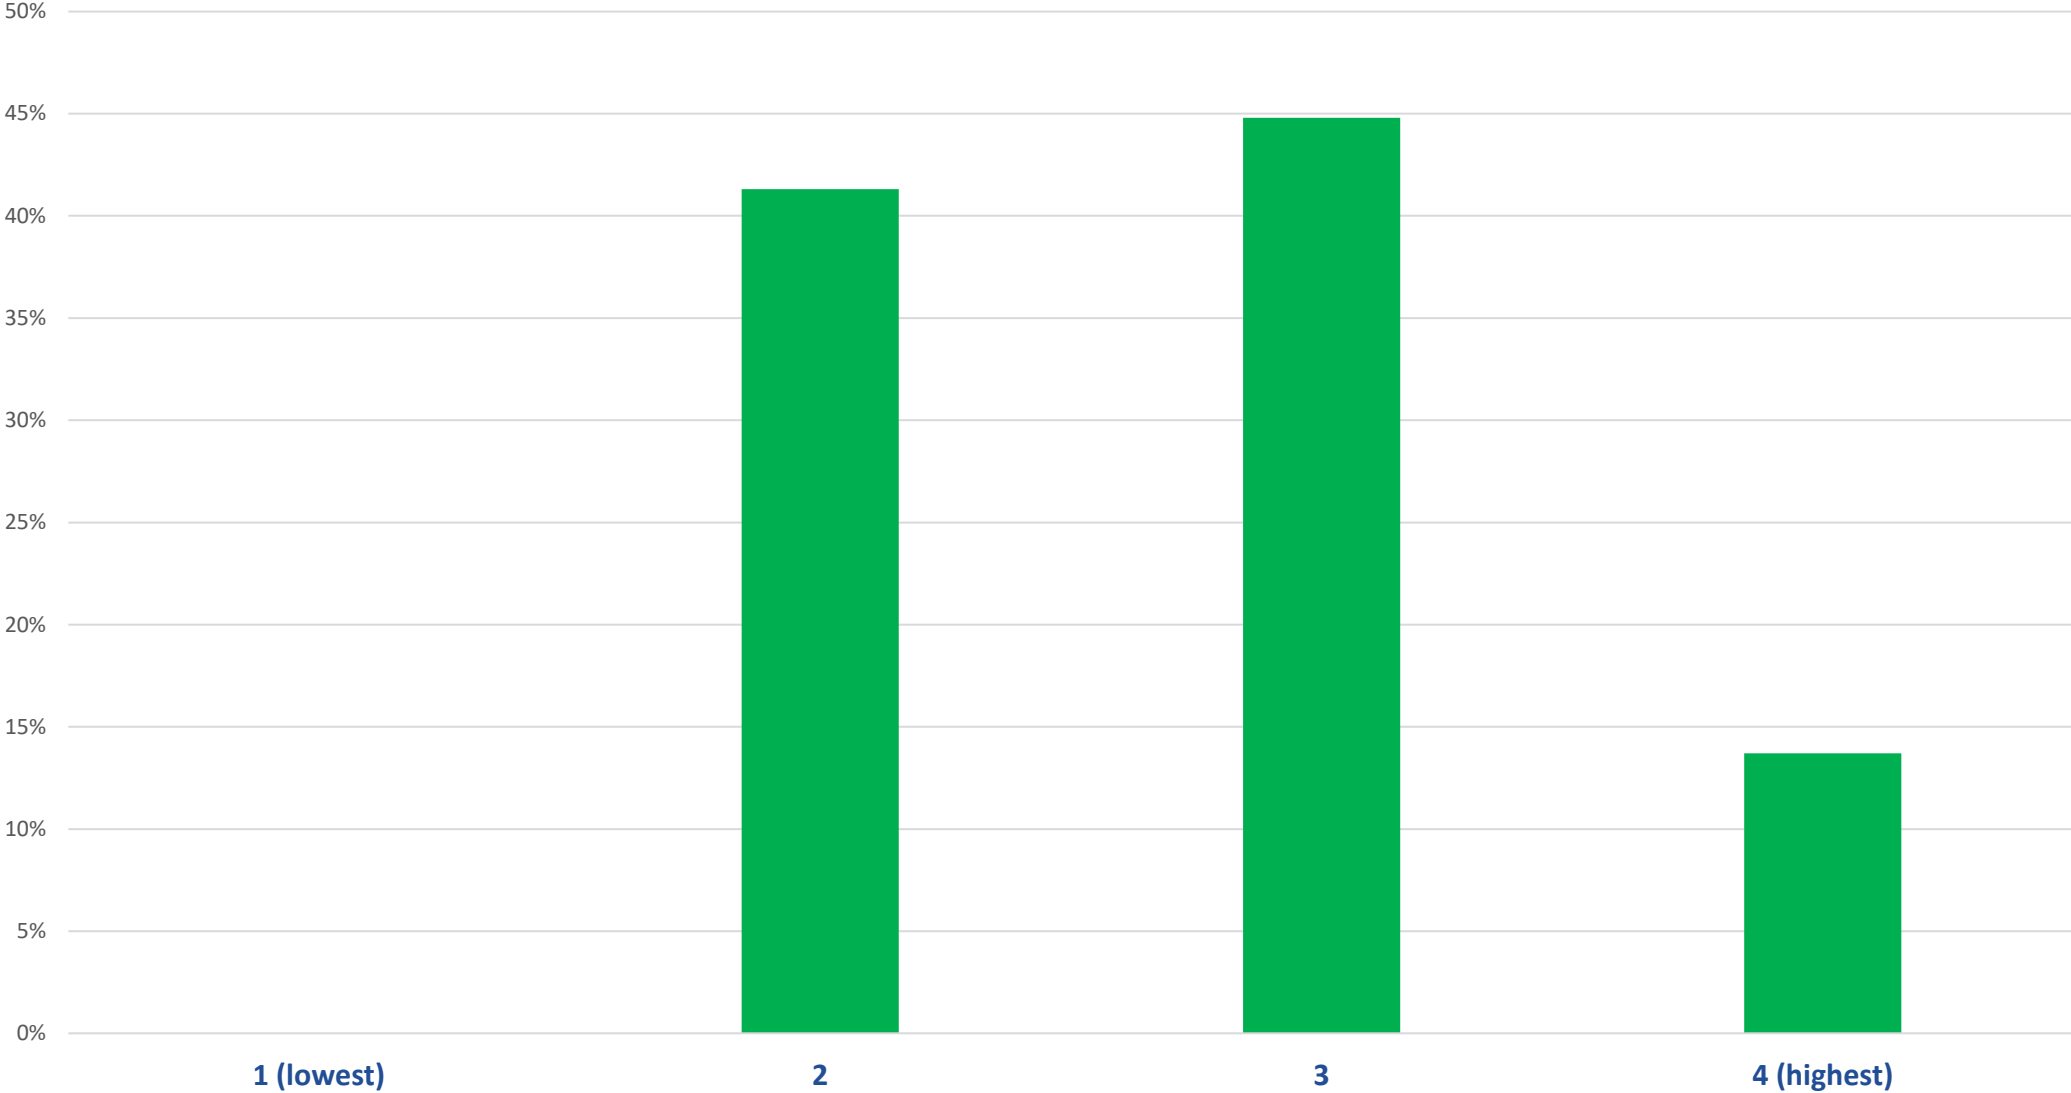

Have you had a breach from a vulnerability in an unpatched system last year?

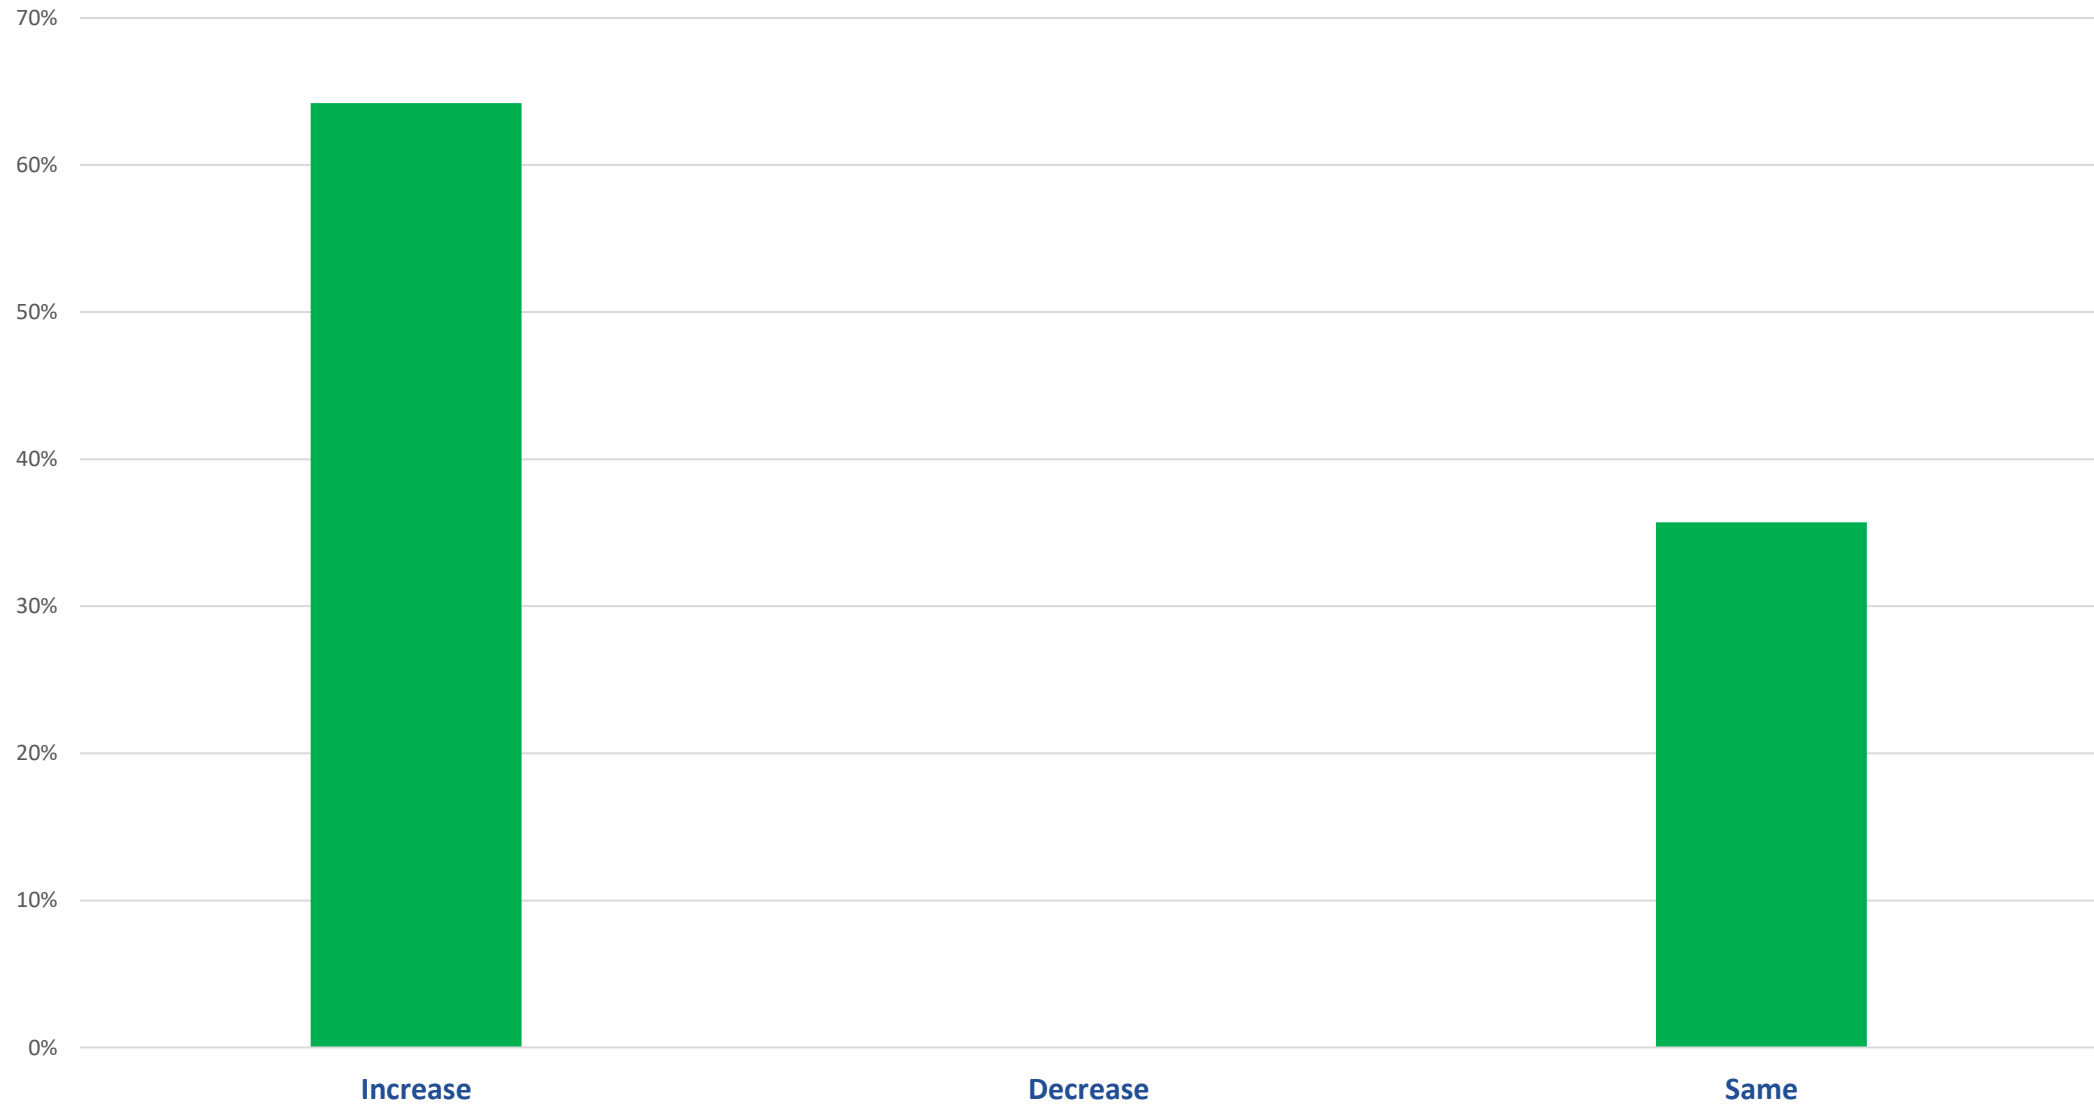

For your most severe breach, how long were your systems down?

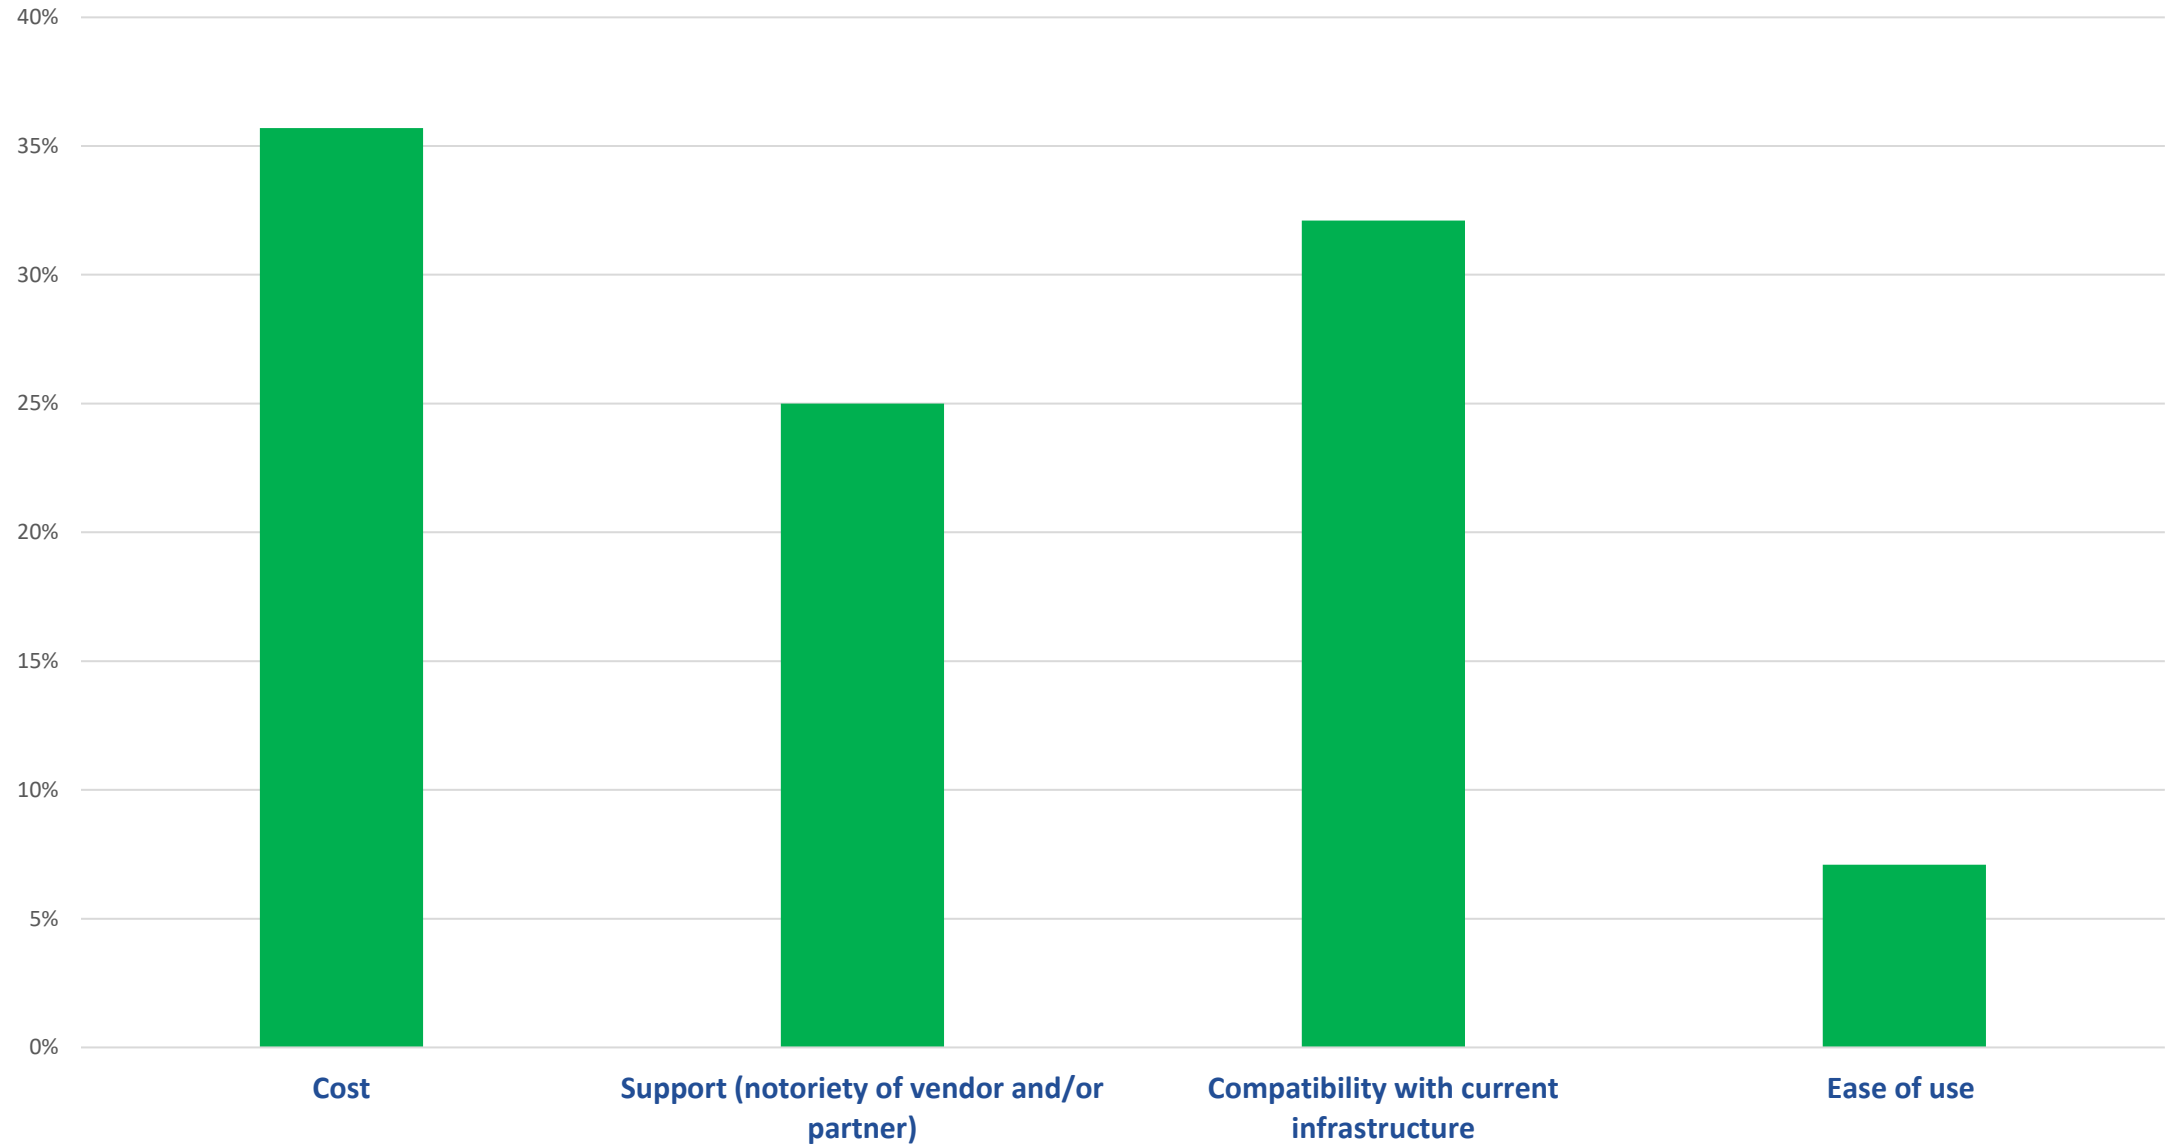

On a scale from 1 to 4 how covered do you think your security needs are?

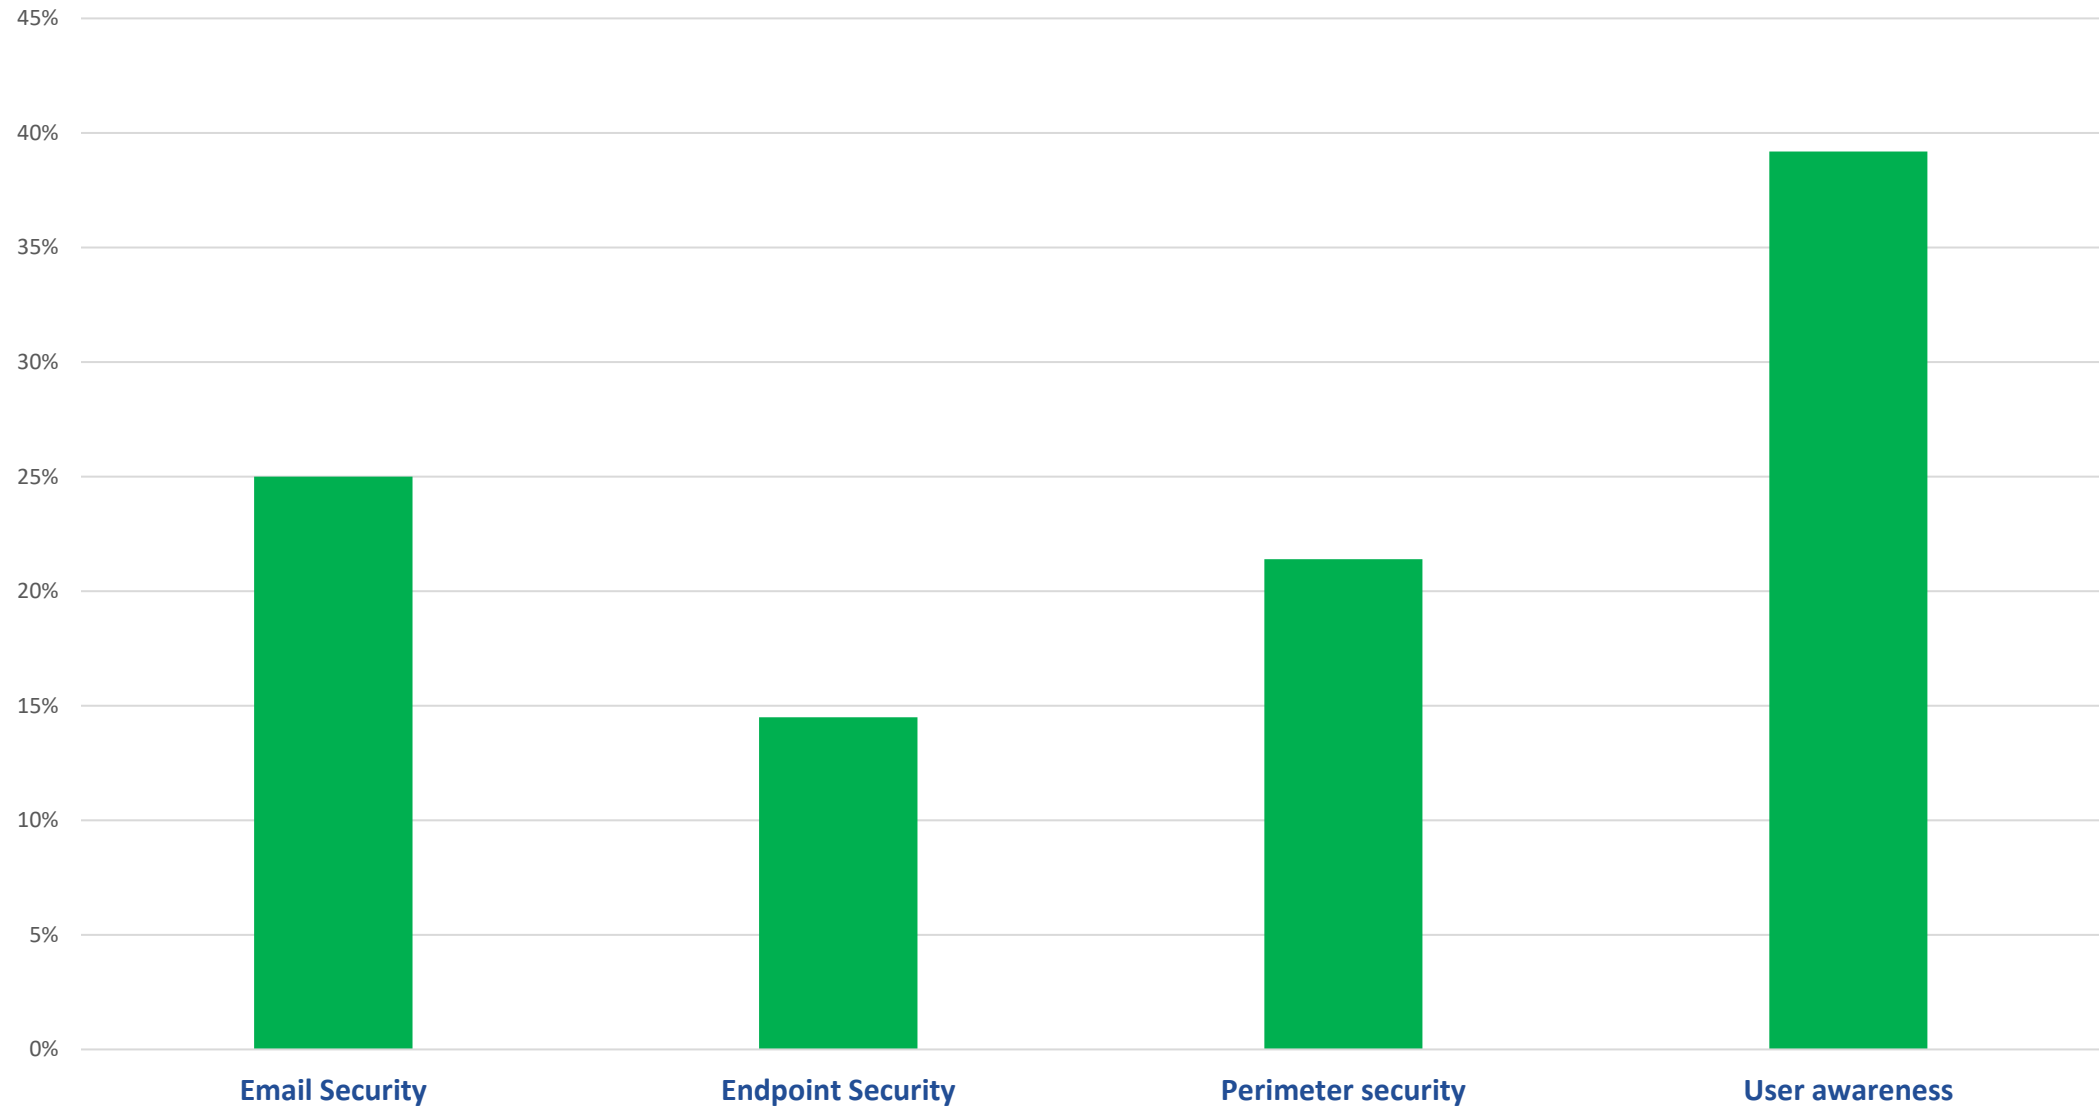

What's your budgetary plans for 2021 regarding your company's ICT Security?

What's the decisive factor when weighing in on an ICT Security product or service?

In which of the following ICT Security areas would you like to improve on this year?

THE END!
